

Good Morning, Myself Vanmathi and I am currently pursuing my Bachelor's degree in Computer Science and Engineering at P.S.R Engineering College and I have a strong interest in becoming a Software Developer.

I have Completed my internship in Alpha web Academy where I learned a Web development and another one is Tech i3 where I gained a practical knowledge in mobile application development. During my internship, I actively worked with modern technologies, gaining a experience in both frontend and backend development.

I have hands-on experience in c,java,sql,web development,Mernstack. I have also completed two major projects one is Digital Bridge for supporting the needy these platform where connects donars to recepients,and another one is Exam availability System that maps degrees to eligible exams.

These projects helped me to enhance my full stack development skills and team collaboration. I have participated in hackathon and Learnathon events and gaining valuable experience in working with new technologies. I am a quick learner,adaptable to new technologies,and passionate about real-world problems through software.

I am excited to contribute my skills to your organization and grow as a developer in a challenging environment. I am looking forward to learn more technologies to enhance my skills.
